
INTERIM WEBSITE & SEO AUDIT REPORT

CASH AHNAWAZ & ASSOCIATES

Website: <https://cashahnawaz.com/>

Prepared for: Website SEO Review & Manual Implementation

Audit Scope: Phases 0, 1A and 1B

Report Date: 2026-08-27

This is an interim audit report based on the completed audit phases. Additional analysis may be added following Internal Linking, Schema, Performance, Competitor, Local SEO, CRO and analytics audits.

Table of Contents

1.	Executive Summary	
2.	Audit Objectives	
3.	Audit Scope & Methodology	
4.	Website Discovery Overview	
5.	Technical SEO Findings	
6.	WordPress SEO Findings	
7.	On-Page SEO Findings	
8.	Content Audit	
9.	Priority Service Coverage	
10.	Top SEO Issues & Opportunities	
11.	Quick Wins — Manual Implementation	
12.	Manual Implementation Roadmap	
13.	30/60/90 Day Roadmap	
14.	Data Limitations	
15.	Next Audit Phases	
16.	Final Conclusion	

SECTION 1

Executive Summary

This report consolidates every audit finding produced to date for <https://cashahnawaz.com/>, a WordPress-based Chartered Accountancy / tax / compliance firm site, across three completed phases:

- **Phase 0 — Discovery:** full sitemap enumeration, technology fingerprinting, and baseline capability assessment.
- **Phase 1A — Technical & WordPress SEO:** crawlability, indexation, sitemap structure, and WordPress/plugin/theme audit.
- **Phase 1B — On-Page & Content Audit:** title/heading/CTA mechanics, content depth and accuracy, priority-service coverage, and content overlap analysis.

No live-site changes have been made or will be made by Claude at any point in this project (see CLAUDE.md's Implementation Policy). Every finding below traces to actual evidence gathered from the live site this session — no keyword, ranking, traffic, conversion, or backlink data exists anywhere in this project, and none is claimed.

Overall characterization

The website sits on a **clean, low-risk technical and WordPress foundation** with **real, addressable content-accuracy and service-coverage gaps**. These are two different categories of problem, and this report keeps them distinct throughout:

- **Phase 1A (technical/WordPress) found zero CRITICAL and zero HIGH severity issues.** All 8 Phase 1A findings are **MEDIUM** or **LOW** — sitemap hygiene items, a footer-link cleanup, and one template-consistency note. Rank Math is confirmed as the sole active SEO plugin with no evidence of a conflicting second SEO plugin, the sitemap is well-formed and correctly segmented, and `robots.txt` has no accidental blocking.
- **All 8 CRITICAL and all 12 HIGH severity findings come from Phase 1B (content and on-page).** These are not structural technical failures — they are content-accuracy issues (stale dates/deadlines presented as current, one wrong firm name in a live FAQ, a self-contradicting figure) and service-coverage gaps (several CLAUDE.md priority services, most notably Private Limited Company Registration, have no dedicated page).

Findings by severity (39 total tracked findings)

8 CRITICAL	12 HIGH	14 MEDIUM	5 LOW	0 OPPORTUNITY (FORMAL)	39 TOTAL TRACKED
---------------	------------	--------------	----------	---------------------------	---------------------

Severity	Count	Phase 1A (Technical/WordPress)	Phase 1B (On-Page/Content)
CRITICAL	8	0	8
HIGH	12	0	12
MEDIUM	14	4	10
LOW	5	4	1
OPPORTUNITY (formal)	0	0	0
Total	39	8	31

8 additional **informal enhancement opportunities** (not defects, not formal findings) are documented in `implementation/CONTENT-ACTION-PLAN.md`'s Opportunity tier — e.g., a possible standalone Bookkeeping page, a Tax Audit/Statutory Audit title-tag consideration. These are separate from the 39 tracked findings.

Genuine strengths (verified, not assumed)

- **CMS and SEO plugin are clean and unambiguous.** WordPress (CONFIRMED), Rank Math SEO (CONFIRMED, sole active SEO plugin — no second-plugin conflict signature found).
- **Sitemap structure is well-formed.** `sitemap_index.xml` correctly segments 108 URLs across `page-sitemap.xml`, `post-sitemap.xml`, and `category-sitemap.xml`; `robots.txt` blocks nothing it shouldn't.
- **No priority service page was found noindexed, blocked, or in an error state.**
- **Strong content depth on several flagship pages:** GST Registration (documents table, 5-Q&A FAQ, and the site's clearest published fee — the only pages this transparent are 2 of 13); NRI Taxation (15 H2 sections covering DTAA treaties, FEMA, residential-status determination, and case law); the Section 8 Company + 12A/80G pair, which accurately maps the real two-step NGO formation-then-exemption lifecycle.
- **Accounting and Audit are cleanly differentiated** — confirmed zero cross-mentions of Tax/Statutory/Internal Audit on the Accounting Services page, clearing a conflation risk common on thin CA-firm sites.
- **All 13 Tier 1 (highest-commercial-value) pages received full content-quality review** — the highest-confidence coverage tier in this audit.

Main areas requiring attention

1. **Content accuracy on regulated/financial content.** 15 items across the site carry a `PROFESSIONAL / CURRENT REGULATORY VERIFICATION REQUIRED` flag — dates, deadlines, and thresholds that are either confirmed stale or lack a currency signal. This is the single largest concentration of risk in the audit.
2. **Priority service coverage gaps.** Of the services named in CLAUDE.md, 12 have no dedicated page — most severely **Private Limited Company Registration**, the dominant entity type for Indian SMEs, which has zero coverage despite less-common entity types (Public Limited, Section 8) being fully built out.
3. **Trust-signal gaps.** No individually named, checkable CA/CS credential exists anywhere on the site; the homepage's own "TESTIMONIALS" section renders empty; 8 of 13 Tier 1 pages carry no testimonials at all.
4. **Minor technical hygiene.** A likely page/taxonomy slug collision, outdated footer links, and two thin category archives — all MEDIUM or LOW, all straightforward to fix.

Immediate priorities

1. Correct the wrong firm name ("TAXZONA Consultancy") published in the Accounting Services FAQ — a single-sentence fix with outsized trust impact.
2. Route the three stale Tier 1 compliance pages (ITR Mumbai, LLP Annual Filing, 12A/80G) and three stale Tier 3 due-date articles to a qualified CA/tax professional for verification and relabeling.
3. Resolve the Public Limited Company page's self-contradicting paid-up-capital figures.
4. Begin scoping a dedicated Private Limited Company Registration page — the highest-priority content gap identified.

SECTION 2

Audit Objectives

Per CLAUDE.md's Main SEO Goal, this audit (and the eventual implementation it supports) exists to help the firm:

- Rank higher in Google for its priority services.
- Increase qualified organic traffic.
- Improve website engagement and user numbers.
- Increase form submissions and genuine (non-spam) enquiries.
- Improve phone and WhatsApp contacts.
- Improve visibility and conversion for all 25 priority services named in CLAUDE.md, including registration and compliance services.

Every finding in this report is mapped to the stage(s) of the site's success funnel it affects, so recommendations tie to a business outcome rather than a technical checkbox in isolation:

A technical crawlability issue typically affects the top of this funnel (Organic Visibility). A stale FAQ or a self-contradicting figure typically affects the middle-to-bottom (Trust & Engagement, Genuine Enquiry) — a visitor who already found the page loses confidence at the exact point they would otherwise convert. A missing service page affects the very top — the visitor never reaches the site at all for that query.

SECTION 3

Audit Scope & Methodology

Method used throughout: WebFetch (AI-summarized HTML→markdown extraction) against live URLs — no browser automation, no raw HTTP header inspection, no guaranteed JavaScript rendering. PowerShell was used only for local file operations, never against the live site. No GSC, GA4, GTM, WordPress Admin, or hosting connector was available in any session to date; each was independently re-verified as unavailable rather than assumed (see `reports/00-capability-check.md`).

Audit Area	Status	Coverage
Website Discovery	Completed	111 URLs discovered (108 sitemap + 3 footer-only), full sitemap enumeration
Technical SEO	Completed (Phase 1A)	53/111 URLs (48%) individually fetched this phase; 100% of Tier 1 + Tier 2; Tier 3 sampled 15/66 (23%)
WordPress SEO	Completed (Phase 1A)	Fingerprint-only evidence (public REST API + sitemap comments) — no admin access
On-Page SEO	Completed (Phase 1B)	Tier 1: 13/13 (100%) full content-quality review; Tier 2: title-level only (1/15 content-quality pass); Tier 3: partial sample
Content Audit	Completed (Phase 1B)	Same coverage pattern as On-Page SEO above
Service Coverage	Completed (Phase 1B)	All named CLAUDE.md priority services classified (see Section 9)
GSC	DATA NOT AVAILABLE	No connector this session
GA4	DATA NOT AVAILABLE	No connector this session
GTM	DATA NOT AVAILABLE	No connector this session
Performance / Core Web Vitals	DATA NOT AVAILABLE	No testing tool this session
Internal Linking	Not Yet Audited	Scheduled next phase
Schema	Not Yet Fully Audited	JSON-LD presence not visible this session (tool limitation, not confirmed absence)
Competitor Analysis	Not Yet Audited	Scheduled future phase
Local SEO	Not Yet Audited	Scheduled future phase
CRO	Not Yet Fully Audited	Content-alignment only checked (Section 9 of <code>reports/03-on-page-seo.md</code>); design/UX-level CRO not performed

Cumulative individual-fetch coverage across both phases: 62 of 111 URLs (56%). Tier 1 (13 URLs) is at 100% depth on both technical and content-quality dimensions — the highest-confidence tier in this audit. Tier 2 (15 URLs) is at 100% title-level verification but only 1 of 15 received a full content-quality pass. Tier 3 (66 blog/article URLs) is a disclosed 35% sample (23 of 66), not a full crawl.

Key limitation carried through every phase: WebFetch's HTML→markdown conversion does not reliably surface `<head>` / `<script>` -level content. Meta robots tags, canonical tag targets, and JSON-LD structured data were **NOT VISIBLE** on effectively every fetch this session, sitewide — this is treated throughout as a tool limitation, never as evidence that these elements are absent. See Section 14 for the full limitations list.

SECTION 4

Website Discovery Overview

Item	Finding	Confidence
CMS	WordPress	CONFIRMED — public <code>/wp-json/</code> REST discovery document; site name "Shahnawaz and Associates," description "Chartered Accountant"
SEO plugin	Rank Math SEO	CONFIRMED — named explicitly in an XML comment inside <code>sitemap_index.xml</code> and all 3 child sitemaps, corroborated by <code>rankmath/v1</code> REST namespaces. No second SEO plugin's namespace (Yoast, AIOSEO) found — LIKELY not a plugin-conflict situation
Page builder	Elementor + Elementor Pro + Elementor AI	CONFIRMED — REST namespaces present; popup CTAs use Elementor Pro popup-action URL parameters
Theme	OceanWP	LIKELY — REST namespace only, not admin-confirmed
Caching	LiteSpeed Cache	LIKELY — REST namespace only
Form plugin	Contact Form 7 and/or Forminator	POSSIBLE, ambiguous — both namespaces present in <code>/wp-json/</code> ; which actually renders the live enquiry form (or whether it's native Elementor Forms) could not be determined
GTM container / JSON-LD schema	Not detected in any fetch	NOT DETERMINED — actively searched for, not found; this is a known WebFetch blind spot, not confirmed absence

Sitemap: `sitemap_index.xml` confirmed live and Rank Math-generated. Lists 3 child sitemaps: `page-sitemap.xml` (42 URLs), `post-sitemap.xml` (58 URLs), `category-sitemap.xml` (8 URLs) — 108 URLs total. `sitemap.xml` and `wp-sitemap.xml` return identical content, likely aliases, but the exact mechanism (redirect vs. multiple live origins vs. tool normalization) is `RAW HEADER / REDIRECT VERIFICATION NOT AVAILABLE`.

Total URL inventory: 111 (108 sitemap-listed + 3 footer-linked URLs absent from every sitemap). One duplicate is present: `/trademark-registration/` appears as both a page and a category-archive entry (see TECH-001, Section 5).

Coverage tier breakdown

Tier	URLs	Individually Verified
Tier 1 — Critical Commercial	13	13/13 (100%)
Tier 2 — Supporting	15	15/15 title-level (100%); 1/15 content-quality
Tier 3 — Blog/Article	66	23/66 (35%), disclosed sample
Not Prioritized (legal/tools/archives)	18	Sitemap metadata only

URLs individually fetched across both phases: 62 of 111 (56%). The remaining 44% rely on XML sitemap metadata (URL + lastmod) only, with no independently confirmed live content, status, or on-page elements.

SECTION 5

Technical SEO Findings

7 TECH findings total (from Phase 1A). 0 CRITICAL, 0 HIGH — all TECH findings are MEDIUM or LOW. No priority service page was found noindexed, blocked, or in an error state.

A. Confirmed Issues

MEDIUM

TECH-003 Two thin, single-item category archives indexed via the sitemap

Confidence

CONFIRMED

Affected Area

<https://cashahnawaz.com/mca/>, <https://cashahnawaz.com/donation/>

Evidence Summary

Both are listed in `category-sitemap.xml` but each resolves to exactly one post, with no pagination — versus 8–10 items on the site's other 5 checked category archives.

SEO Impact

Crawlability/Indexability. Thin single-item archives are classic low-value indexed content that can dilute overall site quality signals; "MCA" also maps to a priority-service group, so this is an under-built opportunity as well as a hygiene issue.

Recommended Fix

Exclude both taxonomies from the XML sitemap, merge each single article into a broader category with a redirect, or build out substantive content for `/mca/` given its priority-service relevance.

Manual Implementation Guide

In Rank Math → Sitemap Settings → Taxonomies, toggle off sitemap inclusion for the `mca` and `donation` terms; alternatively, in Rank Math → Titles & Meta → Taxonomies, set a noindex directive on these two terms while keeping the archive reachable to visitors.

Validation

Re-fetch `category-sitemap.xml` and confirm the toggled term(s) no longer appear.

Evidence Source

`data/crawl/_batch-b-archives-footer.md`

MEDIUM

TECH-004

Stale, deadline-specific compliance content live and indexed with no visible currency update

Confidence

CONFIRMED

Affected Area

<https://cashahnawaz.com/gst-amnesty-scheme-2023/>, <https://cashahnawaz.com/big-relief-for-taxpayers-whose-gst-number-got-canceled-due-to-non-filing-of-gst-returns/>

Evidence Summary

The GST amnesty article's title, H1, and body are entirely anchored to a window its own text states closed 30 June 2023, with no visible revision — yet its sitemap `lastmod` (2026-05-06) is roughly 3 years newer than the deadline it describes as closed.

SEO Impact

Organic Visibility and Qualified Traffic. Indexed pages describing expired deadlines without an "ended" notice risk misleading a searcher landing via a stale ranking.

Recommended Fix

Add a clear "this scheme window has closed" notice at the top of both articles; route to a full content-currency review.

Manual Implementation Guide

In the WordPress/Elementor editor, add a dated update notice block at the top of each article's content before any other page edits.

Validation

Re-fetch both URLs and confirm the notice is visible in the rendered content.

Evidence Source

`data/crawl/_batch-c-tier3-sample.md`

LOW TECH-006 Mixed `http://` / `https://` scheme in internal link hrefs

Confidence	CONFIRMED
Affected Area	Sitewide (footer links specifically confirmed; broader scope not independently verified)
Evidence Summary	Multiple internal links (e.g., footer links to Contact Us, Accounting Services) use a literal <code>http://</code> scheme despite the site serving exclusively over HTTPS.
SEO Impact	Crawlability. Each <code>http://</code> link forces an extra redirect hop (assuming HTTPS enforcement is in place, itself unconfirmed), diluting link equity slightly and adding avoidable crawl overhead.
Recommended Fix	Bulk-update all internal hrefs to <code>https://</code> .
Manual Implementation Guide	Use a database-safe search-and-replace tool (e.g., "Better Search Replace" plugin, safe for serialized Elementor JSON) to replace <code>http://cashahnawaz.com</code> with <code>https://cashahnawaz.com</code> across post/page content and Elementor templates; separately review Appearance → Menus for manually-entered <code>http://</code> URLs.
Validation	Re-fetch the footer and main navigation and confirm all internal hrefs now read <code>https://</code> .
Evidence Source	<code>data/crawl/site-inventory-notes.md</code> ; <code>data/crawl/_batch-b-archives-footer.md</code>

B. Likely Risks

MEDIUM TECH-001 `/trademark-registration/` page/taxonomy slug collision in the sitemap

Confidence	LIKELY
Affected Area	<code>https://cashahnawaz.com/trademark-registration/</code>
Evidence Summary	The identical URL is listed in both <code>page-sitemap.xml</code> (lastmod 2026-07-22) and <code>category-sitemap.xml</code> (lastmod 2026-05-06), with conflicting freshness signals. Live content resolves as single-article-style, not a multi-item taxonomy listing.
SEO Impact	Crawlability/Indexability. Conflicting sitemap signals for one URL can confuse how Google associates freshness/content-type with the page.
Recommended Fix	Confirm the collision in WordPress Admin, then rename the taxonomy term's slug and redirect if it was ever independently indexed.
Manual Implementation Guide	In WordPress Admin, check Pages/Posts and Categories/Taxonomies for a <code>trademark-registration</code> slug on both. If both exist, rename the taxonomy term's slug (e.g., <code>trademark-registration-articles</code>) via the standard category-edit screen; if the old slug was ever separately indexed, add a redirect via Rank Math → Redirections (module must be enabled first under Rank Math → Dashboard → Modules).
Validation	Re-fetch <code>category-sitemap.xml</code> and confirm <code>/trademark-registration/</code> no longer appears there under the renamed term.
Evidence Source	<code>data/crawl/sitemap-discovery.md</code> ; <code>data/crawl/phase-1a-sitemap-audit.md</code> Section 4

MEDIUM TECH-002**Three footer-linked URLs point to outdated/mistyped slugs not present in the XML sitemap**

Confidence	LIKELY
Affected Area	http://cashahnawaz.com/project-business/trademark-registration/ , http://cashahnawaz.com/income-tax-return-filling-in-mumbai/ (typo "filling"), http://cashahnawaz.com/online-tds-return-filing/
Evidence Summary	All three load live content matching an existing, correctly-slugged sitemap page, but whether they are separate live duplicate pages or silently redirect could not be confirmed (no raw HTTP header tool available).
SEO Impact	Crawlability/Indexability, and potentially Duplicate Content. A sitewide, high-frequency link position (the footer) is spending link equity on outdated URLs.
Recommended Fix	Update footer hrefs to the current, correctly-slugged https:// URLs; separately confirm via WordPress Admin whether the old slugs still resolve to live content (redirect/noindex if so).
Manual Implementation Guide	In WordPress Admin → Appearance → Menus (or the Elementor footer template), locate the three footer links and update their hrefs to https://cashahnawaz.com/trademark-registration/ , https://cashahnawaz.com/income-tax-return-filing-in-mumbai/ , and https://cashahnawaz.com/tds-return-filing-services/ respectively.
Validation	Re-fetch the site footer and confirm all links use https:// and current slugs; re-fetch the three old URLs and confirm they either 301 to the correct page or return a clean 404/410.
Evidence Source	data/crawl/site-inventory-notes.md ; data/crawl/_batch-b-archives-footer.md Part 2

C. Possible Risks**LOW TECH-005 Possible keyword cannibalization: GST registration blog article vs. Tier 1 service page**

Confidence	POSSIBLE
Affected Area	https://cashahnawaz.com/how-to-file-gst-registration-process-benefits-penalty/ (blog, lastmod 2022-10-31) vs. https://cashahnawaz.com/gst-registration-online/ (Tier 1, lastmod 2026-06-18)
Evidence Summary	Both cover the same threshold/documents/process/penalty topics for the same core "how to register for GST" intent, with the older article offering no clearly distinct angle.
SEO Impact	Organic Visibility. If both target similar intent, they may split ranking signals — a content-overlap observation, not a confirmed ranking-dilution finding (no GSC query data available).
Recommended Fix	Route to a content-strategy decision: differentiate the blog article's intent explicitly, or merge/redirect it into the service page.
Validation	Once GSC query-level data becomes available, check whether both URLs appear for overlapping queries.
Evidence Source	data/crawl/_batch-c-tier3-sample.md

LOW TECH-007

/tax-case-law/ index page may be under-populated relative to sitemap-listed case-law articles

Confidence	POSSIBLE
Affected Area	https://cashahnawaz.com/tax-case-law/
Evidence Summary	The index page fetch surfaced only 1 case-law item, while the sitemap lists approximately 19 distinct case-law URLs. Could reflect a genuine content gap or a fetch/extraction limitation.
SEO Impact	Crawlability (internal linking specifically) — if genuinely under-populated, ~18 case-law articles rely entirely on the sitemap and category archive for discovery.
Recommended Fix	Manually re-check the page in a browser to confirm whether more items exist below the fold; if genuinely under-populated, add the missing articles to the index.
Validation	Direct browser or raw-HTML re-check of the page.
Evidence Source	data/crawl/_batch-a-tier1-tier2.md

D. Technical Limitations (sitewide, DATA NOT AVAILABLE this session)

Data source	Status
Raw HTTP response headers (status codes, X-Robots-Tag, redirects)	DATA NOT AVAILABLE
Browser automation / rendered screenshots	DATA NOT AVAILABLE
Meta robots tag content (sitewide)	NOT VISIBLE (tool limitation)
Canonical tag target (sitewide)	NOT VISIBLE (tool limitation)
JSON-LD / structured data presence (sitewide)	NOT VISIBLE (tool limitation)
JS-rendered / client-side-injected content	DATA NOT AVAILABLE
GSC / GA4 / GTM	DATA NOT AVAILABLE
WordPress Admin / hosting access	DATA NOT AVAILABLE
Lighthouse / PageSpeed / Core Web Vitals	DATA NOT AVAILABLE

robots.txt (confirmed, for contrast — this one item IS fully verified):

```
User-agent: *
Disallow: /wp-admin/
Disallow: /wp-admin/admin-ajax.php

Sitemap: https://cashahnawaz.com/sitemap_index.xml
```

No accidental blocking of content/service paths was found.

SECTION 6

WordPress SEO Findings

Access mode: fingerprint-only. No WordPress Admin login was attempted or available in any session — every fact below is inferred from public live-site evidence (the `/wp-json/` REST discovery document, sitemap XML comments, and rendered page content), never from confirmed admin access.

Rank Math (SEO Plugin)

Identity: CONFIRMED. No second SEO plugin's namespace (Yoast, AIOSEO) was found among 48 REST namespaces — **LIKELY** NOT a plugin-conflict situation, though not admin-confirmed.

Item	Status	Confidence
Sitemap config (page/post/taxonomy correctly separated)	Page/post/taxonomy sitemaps cleanly split	CONFIRMED
Taxonomy sitemap inclusion	Present, but includes 2 thin single-item archives (see TECH-003)	CONFIRMED
Schema output (JSON-LD)	Not surfaced on any of 53+ fetches despite Rank Math injecting schema by default	NOT VISIBLE — tool limitation, not confirmed absence
Canonical output	Not surfaced on any fetch	NOT VISIBLE — tool limitation
Robots meta output	Not surfaced on any fetch	NOT VISIBLE — tool limitation
Breadcrumb signals	No breadcrumb trail reported in any fetch	NOT DETERMINED
Duplicate schema risk (theme vs. plugin)	Cannot be assessed without visible schema output	NOT DETERMINED

Modular-plugin note: Rank Math ships modularly — its Redirections and Schema Generator modules must be individually enabled under Rank Math → Dashboard → Modules before the corresponding menu items exist. This should be confirmed before executing any Implementation Step above that references Redirections.

Elementor (Page Builder)

Identity: CONFIRMED (`elementor/v1`, `elementor-pro/v1`, `elementor-ai/v1` namespaces; popup CTAs use Elementor Pro popup-action URL parameters). Likely add-ons: ElementsKit, JetKit — **LIKELY**, not admin-confirmed.

LOW

WP-001 Inconsistent content template across ITR industry-specific pages

Confidence

CONFIRMED

Affected URLs

<https://cashahnawaz.com/itr-filing-for-event-management-and-entertainment-professionals/>, <https://cashahnawaz.com/itr-filing-for-content-creators-influencers/>

Evidence Summary

2 of the 9 industry-specific ITR filing pages use an older, shorter Elementor template ("Introduction / Who Should File / 5 Important Case Laws / Practical Checklist") than the other 7, which share a newer, more comprehensive template referencing "Income Tax Act 2025," presumptive taxation, MSME compliance, and compliance calendars.

SEO Impact

Organic Visibility and Engagement. The 2 outlier pages likely offer thinner topical coverage than their 7 siblings.

Recommended Fix

Rebuild the 2 outlier pages using the 7-page family's template/section structure.

Manual Implementation Guide

In Elementor, open one of the 7 up-to-date pages, use "Save as Template" (Elementor Pro), then apply that template to the 2 outlier pages, replacing content section-by-section with industry-specific detail.

Validation

Re-fetch both outlier URLs and confirm the H2 structure matches the 7-page family's pattern.

Evidence Source

[data/crawl/_batch-a-tier1-tier2.md](#)

Theme, Caching, and Forms

Component	Status	Confidence
Theme (OceanWP)	REST namespace only, not admin-confirmed	LIKELY
Caching (LiteSpeed Cache)	REST namespace only; plugin presence alone cannot confirm actual performance impact	LIKELY
Form plugin (Contact Form 7 vs. Forminator vs. native Elementor Forms)	Both CF7 and Forminator namespaces present in <code>/wp-json/</code> ; no distinguishing CSS class surfaced on any of 53+ fetches; namespace presence proves installation, not which plugin (if either) actually renders the live form	POSSIBLE, ambiguous
Permalink structure	Clean "post name"-style permalinks sitewide, no <code>?p=123</code> seen	LIKELY (not admin-confirmed)
Live chat (Chatway)	Namespace present; no widget visually confirmed	POSSIBLE
Notification bar	Namespace present; no bar observed	POSSIBLE
GTM container (<code>GTM-N2LHGRCX</code> per <code>CLAUDE.md</code>)	Not detected in any fetch	NOT DETERMINED — not a confirmed absence

Why this matters for implementation: The form-plugin ambiguity must be resolved via WordPress Admin (Plugins list + inspecting a live form's rendered HTML class names) before any form-specific step (e.g., a GTM form-submission trigger keyed to a specific plugin's event) is attempted — this is an explicit blocker for the future GTM Conversion Audit phase.

Items requiring WordPress Admin verification

- Theme identity (OceanWP → CONFIRMED)
- Form plugin identity (CF7 vs. Forminator vs. native Elementor Forms)
- The TECH-001 trademark-registration slug collision
- The OP-002 "LLP Registration" nav-link label/target
- Whether Rank Math's Redirections and Schema Generator modules are enabled
- Actual Rank Math schema/canonical/robots-meta output (requires raw-HTML or admin view)

SECTION 7

On-Page SEO Findings

Coverage: All 13 Tier 1 pages received a full content-quality deep review this phase, on top of Phase 1A's title/H1-level check — the highest-confidence tier in this audit. Tier 2 remains at title-level only (1 of 15 pages received a content-quality pass). Tier 3 remains a 35% sample.

No keyword volume, ranking, or GSC/GA4 data was available or used anywhere in this section. Every search-intent statement is labeled `LIKELY USER SEARCH INTENT`; `SEARCH DEMAND DATA NOT AVAILABLE` applies wherever keyword-volume evidence would otherwise be needed.

Strengths observed across Tier 1

- Logical, scannable H2/H3 structure on nearly every page; FAQ sections present on 12 of 13 pages.
- Strong internal linking from the 9 industry ITR pages, NRI Taxation, and TDS pages into the main ITR Mumbai hub.
- Two pages (Audit Services, LLP Annual Filing) show genuinely good practice not replicated elsewhere: Audit Services carries an explicit disclaimer; LLP Annual Filing has the only "Why us" trust section in the batch.

Common weaknesses across Tier 1

- **Pricing disclosure is inconsistent with no discernible logic** — only 2 of 13 pages state an actual price (OP-003).
- **Trust signals are thin and uneven** — no individually named, checkable credential anywhere; testimonials are duplicated near-verbatim across 4 pages while 8 of 13 pages have none at all (OP-005).
- **The enquiry form is never pre-contextualized per page** — the same generic Name/Email/Mobile/City/Service-dropdown form appears everywhere, never defaulting to the page's own service.
- **Title/meta/canonical/JSON-LD content is `NOT VISIBLE`** on every fetch this session (tool limitation) — no on-page finding in this report asserts a specific title tag, meta description, or canonical target beyond what was directly captured for a small number of pages (noted per-page below where available).

Tier 1 Page-by-Page Summary

URL	Primary Service	Current Status	Main Issue / Opportunity	Recommended Action
<code>/</code> (Homepage)	Brand/navigationa l hub	ADEQUATE	Empty "TESTIMONIALS" section (OP-004); top CTA strip omits GST Registration, GST Return Filing, Audit Services (OP-006)	KEEP AND OPTIMIZE
<code>/gst-registration-online/</code>	GST Registration	STRONG	Misplaced return-filing sentence (OP-008); rupee figures lack a currency date-stamp (CONT-012)	KEEP AND OPTIMIZE
<code>/gst-return-filing/</code>	GST Return Filing	ADEQUATE	"Get a Free Quote" CTA with zero pricing content anywhere on the page; unverified anchor target (CONT-023)	EXPAND EXISTING PAGE
<code>/income-tax-return-filing-in-mumbai/</code>	Income Tax Return Filing	NEEDS IMPROVEMENT	Stale "Assessment Year 2020-21" FAQ reference (CONT-002, CRITICAL)	PROFESSIONAL ACCURACY REVIEW REQUIRED
<code>/itr-filing-for-nri-guide-for-non-resident-taxation/</code>	NRI Taxation	NEEDS IMPROVEMENT	No FAQ, no pricing, zero testimonials for the most trust-barrier-sensitive audience on the site; Act-2025 citations need review (CONT-011)	EXPAND EXISTING PAGE / PROFESSIONAL ACCURACY REVIEW REQUIRED
<code>/accounting-services/</code>	Accounting	NEEDS IMPROVEMENT	Wrong firm name "TAXZONA Consultancy" in live FAQ (CONT-001, CRITICAL)	KEEP AND OPTIMIZE — fix firm name immediately

URL	Primary Service	Current Status	Main Issue / Opportunity	Recommended Action
/audit-services/	Tax Audit / Statutory Audit	ADEQUATE	Internal Audit reduced to a one-row table mention (CONT-017); zero testimonials; unattributed "UDIN-verified" credential; Act-2025 citations need review (CONT-011)	PROFESSIONAL ACCURACY REVIEW REQUIRED
/startup-registration-india/	Startup Registration	ADEQUATE	No trust signals at all; unqualified ₹100 crore / 10-year eligibility figures	KEEP AND OPTIMIZE; verify figures
/section-8-company-registration/	NGO Registration (formation)	STRONG	No trust signals; unqualified penalty figures; no reciprocal link to 12A/80G	KEEP AND OPTIMIZE; verify figures
/public-limited-company/	Company Registration	NEEDS IMPROVEMENT	Self-contradicting minimum paid-up-capital figures (OP-001, HIGH); also evidences the CRITICAL Private Ltd Co coverage gap (CONT-014)	PROFESSIONAL ACCURACY REVIEW REQUIRED
/llp-annual-filing/	ROC/Annual Compliance (LLP)	NEEDS IMPROVEMENT	"Final Year 2021-22" table presented as current (CONT-003, CRITICAL); possible mislabeled nav link (OP-002, HIGH)	PROFESSIONAL ACCURACY REVIEW REQUIRED
/tds-return-filing-services/	TDS Return Filing	ADEQUATE	Claims rates vary but never shows a rate table (one exists unlinked on a separate blog article); no trust signals	KEEP AND OPTIMIZE
/12a-or-12aa-or-80g-registration-new-scheme/	NGO Registration (tax exemption)	NEEDS IMPROVEMENT	Passed 2021–2022 transitional deadlines shown without historical framing (CONT-004, CRITICAL); H1 narrower than actual page scope (OP-007)	PROFESSIONAL ACCURACY REVIEW REQUIRED

On-Page Findings Index (OP-001–OP-008)

ID	Severity	Confidence	Finding	Recommended Fix
OP-001	HIGH	CONFIRMED	Public Limited Company page states two contradictory minimum paid-up capital figures ("Rs 5 lakhs" vs. "no minimum")	Verify current rule with a qualified professional; reconcile both sections to one figure
OP-002	HIGH	LIKELY	Possible mislabeled nav link "Limited Liability Partnership Registration" resolves to the compliance-only LLP Annual Filing page	Verify the nav link's actual label/target in WP Admin; relabel or retarget
OP-003	MEDIUM	CONFIRMED	Inconsistent pricing disclosure across Tier 1 pages — only 2 of 13 show a price, no discernible logic	Make one deliberate sitewide pricing-disclosure decision and apply it consistently
OP-004	HIGH	LIKELY	Homepage's own "TESTIMONIALS" section renders with no populated content	Confirm via live browser check; populate with existing real testimonials if genuinely empty
OP-005	MEDIUM	CONFIRMED	Same 6 testimonials reused near-verbatim across 4 pages; NRI Taxation and Audit Services have zero	Add genuine testimonials to NRI/Audit pages; vary selection across pages
OP-006	MEDIUM	CONFIRMED	Homepage top CTA strip omits GST Registration, GST Return Filing, and Audit Services	Expand the CTA strip to represent all 5 CLAUDE.md priority groups at parity
OP-007	MEDIUM	CONFIRMED	12A/80G page's H1 ("12A Registration Online") is narrower than its actual scope (also covers 80G/12AA)	Update H1 to reflect the full scope
OP-008	LOW	CONFIRMED	Misplaced sentence on GST Registration page describing GST Return Filing turnaround	Remove or correct the misplaced sentence

Full evidence, SEO Impact, and step-by-step Manual Implementation Guide for each finding above is preserved in [reports/03-on-page-seo.md](#) and [implementation/MASTER-ISSUE-TRACKER.md](#).

SECTION 8

Content Audit

Coverage discipline: This section owns content depth, freshness/accuracy, coverage gaps, cannibalization/overlap, and trust/E-E-A-T substance. Title/meta/heading mechanics belong to Section 7. No specific tax rate, due date, threshold, or legal figure is asserted as currently correct or incorrect anywhere in this report — every staleness finding quotes the exact on-page evidence and routes to professional verification.

Strong content areas (named specifically)

- **GST Registration:** a documents-required table, a 5-question FAQ, and the site's clearest published fee (Rs 1,500) — the only page besides ITR Mumbai this transparent on pricing.
- **NRI Taxation:** 15 H2 sections including Residential Status Determination, NRO/NRE/FCNR matrix, DTAA Treaties, NRI TDS Matrix, FEMA & Banking Regulations, and case law — genuinely NRI-specific, not a generic ITR reskin.
- **Section 8 Company Registration:** the deepest ongoing-compliance content in the batch, going beyond formation into post-registration obligations.
- **The Section 8 ↔ 12A/80G pair:** accurately represents the real two-step NGO lifecycle (form the company, then obtain tax exemption) — genuinely complementary coverage, not artificial splitting.
- **Accounting Services:** cleanly differentiated from Audit (zero cross-mentions confirmed), with dedicated sections for Bookkeeping, Financial Reporting, and Outsourced Accounting that fully satisfy those three CLAUDE.md priority services without a separate page.

Content freshness — 15 items requiring professional verification

LIKELY OUTDATED (8 items) — passed deadlines/years presented without historical framing:

#	URL	Issue
1	/gst-amnesty-scheme-2023/	Deadline closed 30 June 2023, lastmod ~3 years newer, no revision visible (TECH-004)
2	/big-relief-for-taxpayers-whose-gst-number-got-canceled.../	Deadline closed 30 June 2023 (TECH-004)
3	/gst-new-update-due-dates-for-october-2021/	October 2021 dates, ~5 years stale, no disclaimer (CONT-005)
4	/due-date-calendar-for-the-month-of-november-2022/	November 2022 dates, no disclaimer (CONT-006)
5	/waiver-of-late-fees-for-gst-annual-return/	Article's own text confirms the waiver window closed 31 March 2025 (CONT-007)
6	/income-tax-return-filing-in-mumbai/(FAQ)	Cites "Assessment Year 2020-21" inside FY2025-26/2026-27-framed content (CONT-002)
7	/llp-annual-filing/	H2 titled "LLP Compliance (The Final Year 2021-22)"; AY2021-22 threshold framing (CONT-003)
8	/12a-or-12aa-or-80g-registration-new-scheme/	Passed 2021–2022 transitional deadlines shown without historical framing (CONT-004)

TIME-SENSITIVE – REVIEW REQUIRED (9 items) — a figure/date present but currency not confirmable from the page alone: /key-recommendations-of-45th-gst-council-meeting/ (CONT-008), /june-2026-important-due-dates/ (CONT-009), /old-vs-new-tax-regime-.../ slab table with no FY/AY label (CONT-010), plus unqualified monetary thresholds/penalties on GST Registration, GST Return Filing, Startup Registration, Section 8 Company, TDS Return Filing, and Public Limited Company (consolidated as CONT-012).

PROFESSIONAL / CURRENT REGULATORY VERIFICATION REQUIRED (1 consolidated item): ITR Mumbai, NRI Taxation, and Audit Services all cite the "New Income Tax Act 2025" alongside old Income Tax Act 1961 section numbers in direct

cross-mappings — the highest-density regulatory-risk pattern in the audit, formalized as one consolidated review item (CONT-011) rather than three separate checks.

CURRENTLY APPEARS EVERGREEN (2 items — positive controls): </tds-chart-for-fy-2026-27/> and </accounting-services/> are both internally date-consistent — included as contrast, not as confirmation that their underlying figures are currently correct.

Pages needing improvement

Accounting Services (firm-name fix, CONT-001), ITR Mumbai / LLP Annual Filing / 12A-80G (stale-reference fixes), Public Limited Company (contradiction fix), Homepage (testimonials/CTA strip), GST Return Filing (pricing/anchor verification). No Tier 1 page warrants replacement — all 13 are recommended for optimization in place.

Commercial content gaps (Section 6A)

Every NO DEDICATED PAGE FOUND gap is detailed in full in Section 9 below. In content terms, the most consequential gaps are: **Private Limited Company Registration** (CONT-014, **CRITICAL** — the single most severe gap in the entire audit, given this is the dominant Indian SME entity type with zero coverage while less-common types are fully built out), **LLP Registration formation** (CONT-015), **Proprietorship Registration** (CONT-016), **Internal Audit depth** (CONT-017, present only as a one-row table mention), and **company-side ROC/Annual Compliance** (CONT-018, directly evidenced by enquiry-dropdown options with zero matching landing page).

Informational content gaps (Section 6B)

- The 12A/80G page's FAQ heading "Due Dates to Apply in Form 10AB" has no populated answer beneath it.
- NRI Taxation is the only Tier 1 page with no FAQ at all, despite arguably generating the most repeat practical questions.
- Section 8 Company and Startup Registration never state the firm's own typical incorporation turnaround (contrast: Public Limited Company states "seven working days").
- GST Return Filing explains what a return *is* but not what a client must *hand over* — no documents checklist, unlike GST Registration.
- A TDS rate table already exists on a separate blog article (</tds-chart-for-fy-2026-27/>) but is not linked from the TDS service page.
- The 12A/80G page links to Section 8; the reverse link was not observed.

Cannibalization and overlap

9 pairs investigated: 1 **LIKELY CANNIBALIZATION RISK**, 5 **POSSIBLE OVERLAP**, 3 **NO MEANINGFUL OVERLAP FOUND**, 0 **CONFIRMED CONTENT DUPLICATION**. No claim of actual SERP-level cannibalization is made anywhere — that requires GSC query-level data, which is **DATA NOT AVAILABLE**.

- **LIKELY:** GST Registration Online vs. the 2022 "How to File GST Registration" blog article (extends TECH-005).
- **POSSIBLE (5):** GST cancellation/revocation sub-topic spread across 3 URLs; the 8-article accounting blog cluster vs. Accounting Services; Section 8 vs. the Section 8/Trust comparative blog; TDS Chart vs. TDS service page; Accounting package bundling vs. GST/TDS service pages.
- **No meaningful overlap:** The 9 industry ITR pages vs. the main ITR Mumbai page (genuinely differentiated); </trademark-registration/> (no competing page exists); Accounting vs. Audit (cleanly separated).
- **New unverified item (CONT-023, MEDIUM/POSSIBLE):** An in-body anchor on the GST Return Filing page resolves to <https://cashahnawaz.com/gst-registration-services-india-a-guide-to-gst/>, a URL absent from the 111-row site inventory — its live status could not be confirmed this session.

Trust, expertise, and credibility (E-E-A-T)

CONFIRMED TRUST GAP items: No individually-named, checkable CA/CS credential anywhere sitewide (CONT-013) — every trust statement is firm-level only. No testimonials on 8 of 13 Tier 1 pages (OP-005). Homepage's "TESTIMONIALS" heading renders empty (OP-004). Wrong firm name in a live FAQ (CONT-001) — the most severe single trust defect found this phase. A minor NAP address-format inconsistency on the 12A/80G page (flagged for a future Local SEO pass, not scored as its own formal finding here).

TRUST OPPORTUNITY items (not defects, concrete low-effort additions): Attaching the existing "ICAI Practising CA UDIN-verified" claim on Audit Services to one named person is identified as the single highest-leverage trust addition in the entire batch, since the positioning work is already done.

Content-Audit Findings Index (CONT-001–CONT-023)

ID	Severity	Confidence	Finding	Recommended Fix
CONT-001	CRITICAL	CONFIRMED	Wrong firm name ("TAXZONA Consultancy") in Accounting Services FAQ	Correct the firm name; audit rest of page for other un-customized template content
CONT-002	CRITICAL	CONFIRMED	ITR Mumbai FAQ cites stale "Assessment Year 2020-21"	Route to qualified professional for verification and current framing
CONT-003	CRITICAL	CONFIRMED	LLP Annual Filing presents "Final Year 2021-22" table/threshold as current	Route to qualified professional; relabel to current or explicitly historical
CONT-004	CRITICAL	CONFIRMED	12A/80G page presents passed 2021–2022 transitional deadlines without historical framing	Route to qualified professional; relabel; complete missing 10AB FAQ answer
CONT-005	CRITICAL	CONFIRMED	/gst-new-update-due-dates-for-october-2021/ — no disclaimer, ~5 years stale	Add historical-reference notice
CONT-006	CRITICAL	CONFIRMED	/due-date-calendar-for-the-month-of-november-2022/ — no disclaimer	Add historical-reference notice
CONT-007	CRITICAL	CONFIRMED	/waiver-of-late-fees-for-gst-annual-return/ — window closed March 2025	Add closed-window notice
CONT-008	HIGH	CONFIRMED	/key-recommendations-of-45th-gst-council-meeting/ lacks historical-record framing	Add "historical record" framing note or archive
CONT-009	MEDIUM	CONFIRMED	/june-2026-important-due-dates/ still featured ~2 months past relevance	Rotate featured-post selection; establish monthly rotation process
CONT-010	HIGH	CONFIRMED	Tax-regime comparison table has no FY/AY label anywhere	Verify applicable year with professional; add explicit label
CONT-011	HIGH	LIKELY	Consolidated: "Income Tax Act 2025" section cross-references need professional verification across 3 pages	One consolidated professional review session
CONT-012	HIGH	CONFIRMED	5 Tier 1 pages state monetary thresholds/penalties with no currency date-stamp	Verify figures; add "current as of [date]" notes
CONT-013	MEDIUM	CONFIRMED	Sitewide E-E-A-T gap — no individually-named CA credential	Add named practitioner bio with ICAI membership number
CONT-014	CRITICAL	CONFIRMED	No Private Limited Company Registration page despite dominant entity type	Content brief + build page; add dropdown option
CONT-015	HIGH	CONFIRMED	No LLP Registration (formation) page, distinct from LLP Annual Filing	Content brief + build page; cross-link with LLP Annual Filing
CONT-016	HIGH	CONFIRMED	No Proprietorship Registration page or lead-capture category	Content brief + build page; add dropdown option
CONT-017	HIGH	CONFIRMED	Internal Audit present only as a one-row table mention	Build a dedicated Internal Audit section on the existing Audit Services page
CONT-018	HIGH	CONFIRMED	No company-side ROC/Company/Annual Compliance page despite confirmed demand	Consolidated pillar page + entity-specific subpages

ID	Severity	Confidence	Finding	Recommended Fix
CONT-019	HIGH	CONFIRMED	No dedicated Tax Consultancy page or lead category	Content brief + build page distinguishing from ITR Filing
CONT-020	MEDIUM	CONFIRMED	Partnership Registration has only an informational article, no service page	Build dedicated service page; link existing article to it
CONT-021	MEDIUM	CONFIRMED	No dedicated page for GST Consultancy / GST Compliance	Content brief for consolidated GST Consultancy & Compliance page
CONT-022	MEDIUM	CONFIRMED	No page distinguishing Income Tax Compliance from ITR Filing	Content brief, cross-linked with ITR Mumbai
CONT-023	MEDIUM	POSSIBLE	Unverified possible third GST-registration-related URL via in-body anchor	Verify target URL live status first, then act

Full evidence, SEO Impact, and step-by-step Manual Implementation Guide for each finding above is preserved in `reports/04-content-audit.md` and `implementation/MASTER-ISSUE-TRACKER.md`.

SECTION 9

Priority Service Coverage

Basis: `data/crawl/service-coverage-map.md` / `.csv`, built against CLAUDE.md's priority-service list. CLAUDE.md names 25 distinct service line items across 5 groups (some working files round this to "23" in prose; this table presents every named service from the coverage map without omission). No new page is recommended anywhere a genuinely adequate existing page already covers the service — the coverage map's own determinations are followed throughout.

Classification summary

9	5	12
DEDICATED AND ADEQUATE	EXISTS UNDER DIFFERENT SERVICE/URL	NO DEDICATED PAGE FOUND

Classification	Count
DEDICATED AND ADEQUATE	9
EXISTS UNDER DIFFERENT SERVICE/URL	5 (one — Annual Compliance — split across two rows below for its LLP vs. non-LLP portions)
NO DEDICATED PAGE FOUND	12

Income Tax

Service	Dedicated Page Status	Existing URL	Quality	Recommended Action	Priority
Income Tax Return Filing	DEDICATED AND ADEQUATE	<code>/income-tax-return-filing-in-mumbai/</code>	Deep	No new page needed; maintain	LOW
Tax Consultancy	NO DEDICATED PAGE FOUND	— (only generic boilerplate on ITR page)	N/A	Content brief for dedicated Tax Consultancy page; add dropdown option (CONT-019)	HIGH
Income Tax Services	EXISTS UNDER DIFFERENT SERVICE/URL	<code>/income-tax-return-filing-in-mumbai/</code> (de facto hub)	Adequate as hub	Consider a distinct pillar page linking to ITR Filing, Tax Consultancy, NRI, Income Tax Compliance	MEDIUM
NRI Taxation	DEDICATED AND ADEQUATE	<code>/itr-filing-for-nri-guide-for-non-resident-taxation/</code>	Deep — 15 H2 sections	No action needed	LOW
Income Tax Compliance	NO DEDICATED PAGE FOUND	—	N/A	Content brief distinguishing ongoing compliance from annual filing (CONT-022)	MEDIUM

GST

Service	Dedicated Page Status	Existing URL	Quality	Recommended Action	Priority
GST Registration	DEDICATED AND ADEQUATE	<code>/gst-registration-online/</code>	Adequate-to-deep	No new page needed	LOW
GST Return Filing	DEDICATED AND ADEQUATE	<code>/gst-return-filing/</code>	Adequate-to-deep	No new page needed	LOW
GST Consultancy	NO DEDICATED PAGE FOUND	— (thin H2 mention on GST Return Filing)	N/A	Content brief for dedicated GST Consultancy/Advisory page (CONT-021)	MEDIUM

Service	Dedicated Page Status	Existing URL	Quality	Recommended Action	Priority
GST Compliance	NO DEDICATED PAGE FOUND	—	N/A	Content brief; consider merging with GST Consultancy (CONT-021)	MEDIUM

Accounting

Service	Dedicated Page Status	Existing URL	Quality	Recommended Action	Priority
Accounting	DEDICATED AND ADEQUATE	/accounting-services/	Adequate-to-deep	No new page needed	LOW
Bookkeeping	EXISTS UNDER DIFFERENT SERVICE/URL	/accounting-services/ (dedicated H2)	Adequate	Optional standalone page as expansion opportunity, not a fix	OPPORTUNITY
Financial Reporting	EXISTS UNDER DIFFERENT SERVICE/URL	/accounting-services/	Adequate	Optional expansion only	OPPORTUNITY
Outsourced Accounting	EXISTS UNDER DIFFERENT SERVICE/URL	/accounting-services/ (dedicated H2, best-covered)	Adequate-to-deep	No action needed	OPPORTUNITY

Audit

Service	Dedicated Page Status	Existing URL	Quality	Recommended Action	Priority
Tax Audit	DEDICATED AND ADEQUATE	/audit-services/	Deep	No new page needed	LOW
Statutory Audit	DEDICATED AND ADEQUATE	/audit-services/ (shares URL/title with Tax Audit)	Deep	No content gap; note shared-URL title-tag consideration for a future on-page-seo pass	LOW
Internal Audit	NO DEDICATED PAGE FOUND	— (thin, one-row mention on /audit-services/)	Thin	Build a dedicated Internal Audit section on the existing Audit Services page (CONT-017)	HIGH

Registration & Compliance

Service	Dedicated Page Status	Existing URL	Quality	Recommended Action	Priority
Company Registration (Private Limited)	NO DEDICATED PAGE FOUND	— (/public-limited-company/ and /startup-registration-india/ both confirmed inadequate substitutes)	N/A	Content brief for a dedicated Private Limited Company Registration page; add dropdown option (CONT-014)	CRITICAL
LLP Registration	NO DEDICATED PAGE FOUND	— (/llp-annual-filing/ is compliance-only)	N/A	Content brief for a dedicated LLP Registration/formation page, cross-linked with LLP Annual Filing (CONT-015)	HIGH
Partnership Registration	NO DEDICATED PAGE FOUND	/tax-guides/partnership-firm-registration-maharashtra/ (informational only)	N/A for a service page	Convert/supplement with a dedicated service page (CONT-020)	MEDIUM
Proprietorship Registration	NO DEDICATED PAGE FOUND	—	N/A	Content brief for a dedicated page; add dropdown option (CONT-016)	HIGH
Startup Registration	DEDICATED AND ADEQUATE	/startup-registration-india/	Adequate	No gap	LOW

Service	Dedicated Page Status	Existing URL	Quality	Recommended Action	Priority
NGO Registration	DEDICATED AND ADEQUATE	/section-8-company-registration/ and /12a-or-12aa-or-80g-registration-new-scheme/	Deep on both	No gap	LOW
ROC Compliance	NO DEDICATED PAGE FOUND (company-side)	/llp-annual-filing/ (LLP-side only)	Adequate for LLP only	Content brief for Company ROC Compliance, cross-linked with LLP Annual Filing (CONT-018)	HIGH
Company Compliance	NO DEDICATED PAGE FOUND	— (dropdown-only demand evidence)	N/A	Content brief for a pillar page + Pvt Ltd/OPC/Section-8 subpages (CONT-018)	HIGH
Annual Compliance	EXISTS UNDER DIFFERENT SERVICE/URL (LLP) / NO DEDICATED PAGE FOUND (other entities)	/llp-annual-filing/ (LLP portion only)	Adequate for LLP only	Consolidate with the Company Compliance content brief; cross-link with LLP Annual Filing (CONT-018)	MEDIUM

Overlap risks flagged in the coverage map: Income Tax Services vs. Income Tax Return Filing (title/keyword dilution); GST Consultancy vs. GST Return Filing's "Top Reasons to Hire a GST Consultant" H2; Tax Audit/Statutory Audit sharing one URL/title; ROC Compliance, Company Compliance, and Annual Compliance are recommended for **consolidated planning as one content initiative**, not three separate thin pages, to avoid creating a new cannibalization risk.

SECTION 10

Top SEO Issues & Opportunities

The table below ranks the audit's most consequential findings by business impact, combining all phases. CONFIRMED and LIKELY/POSSIBLE items are explicitly labeled — never blended.

Priority	Finding	Type	Severity	Confidence	Business Impact	Recommended Action
1	CONT-001	Content accuracy	CRITICAL	CONFIRMED	Wrong firm name in a live Tier 1 FAQ — direct, present-tense credibility failure	Fix immediately; single-sentence edit
2	CONT-014	Service coverage	CRITICAL	CONFIRMED	Zero coverage for the dominant Indian SME entity type	Content brief + build dedicated page
3	CONT-002	Content freshness	CRITICAL	CONFIRMED	Stale AY reference on the flagship Income Tax page	Route to professional review
4	CONT-003	Content freshness	CRITICAL	CONFIRMED	"Final Year 2021-22" table shown as current on LLP Annual Filing	Route to professional review
5	CONT-004	Content freshness	CRITICAL	CONFIRMED	Passed transitional deadlines shown as current on the site's only NGO tax-exemption page	Route to professional review
6	CONT-005/006/007	Content freshness	CRITICAL	CONFIRMED	Three indexed articles present long-expired deadlines with no disclaimer	Add historical/closed-window notices
7	OP-001	On-page accuracy	HIGH	CONFIRMED	Public Limited Company page self-contradicts on a concrete capital figure	Reconcile after professional verification
8	OP-002	On-page/navigation	HIGH	LIKELY	Possible nav-link mislabel silently misroutes LLP formation searchers	Verify label/target in WP Admin
9	OP-004	Trust/E-E-A-T	HIGH	LIKELY	Homepage's own trust section renders empty	Confirm via browser check; populate
10	CONT-011	Content accuracy	HIGH	LIKELY	High-density old/new Act citations across 3 priority pages unverified	One consolidated professional review
11	CONT-012	Content freshness	HIGH	CONFIRMED	5 pages state monetary figures with no currency date-stamp	Verify and date-stamp
12	CONT-015/016/018/019	Service coverage	HIGH	CONFIRMED	LLP Registration, Proprietorship, company-side Annual Compliance, and Tax Consultancy all have confirmed demand and zero content	Content-production batch
13	CONT-017	Service coverage	HIGH	CONFIRMED	Internal Audit reduced to a one-row table mention	Build a dedicated section
14	CONT-008/010	Content freshness	HIGH	CONFIRMED	Missing historical framing / missing FY label on 2 articles	Add framing/labels
15	TECH-001/002	Technical	MEDIUM	LIKELY	Slug collision + 3 outdated footer links	Confirm in Admin; update hrefs
16	TECH-003/004	Technical	MEDIUM	CONFIRMED	Thin archives; stale GST amnesty content	Sitemap toggle; add notices
17	OP-003/005/006/007	On-page/trust	MEDIUM	CONFIRMED	Pricing inconsistency; testimonial duplication/absence; CTA-strip gap; H1 scope mismatch	Standardize per-item guidance
18	CONT-013	Trust/E-E-A-T	MEDIUM	CONFIRMED	No individually-named, checkable CA credential sitewide	Add named practitioner bio
19	CONT-020/021/022	Service coverage	MEDIUM	CONFIRMED	Partnership Registration, GST Consultancy/Compliance, Income Tax Compliance gaps	Content briefs, lower urgency

Priority Finding		Type	Severity	Confidence	Business Impact	Recommended Action
20	TECH-005/006/007, WP-001, OP-008, CONT-009/023	Technical/On-page	LOW / MEDIUM	Mixed	Minor hygiene and possible-confidence items	Address opportunistically

Complete Finding Index (all 39 tracked findings)

ID	Severity	Confidence	Issue	Recommended Action
TECH-001	MEDIUM	LIKELY	/trademark-registration/ page/taxonomy slug collision	Confirm in WP Admin; rename taxonomy slug
TECH-002	MEDIUM	LIKELY	3 footer links use outdated/mistyped slugs, http:// scheme	Update footer hrefs; confirm old slugs' status
TECH-003	MEDIUM	CONFIRMED	2 thin single-item category archives indexed	Exclude from sitemap or build out content
TECH-004	MEDIUM	CONFIRMED	Stale, deadline-specific compliance content live with no update	Add "scheme closed" notice
TECH-005	LOW	POSSIBLE	Possible cannibalization: GST blog article vs. Tier 1 page	Route to content-strategy decision
TECH-006	LOW	CONFIRMED	Mixed http/https scheme in internal links	Bulk search-and-replace to https
TECH-007	LOW	POSSIBLE	/tax-case-law/ index may be under-populated	Manual re-check; add missing articles
WP-001	LOW	CONFIRMED	2 of 9 ITR industry pages use an older Elementor template	Rebuild using the 7-page family's template
OP-001	HIGH	CONFIRMED	Public Ltd Co self-contradicts on paid-up capital	Reconcile after professional verification
OP-002	HIGH	LIKELY	Possible mislabeled "LLP Registration" nav link	Verify label/target in WP Admin
OP-003	MEDIUM	CONFIRMED	Inconsistent pricing disclosure across Tier 1	Standardize sitewide policy
OP-004	HIGH	LIKELY	Homepage testimonials section renders empty	Confirm and populate
OP-005	MEDIUM	CONFIRMED	Testimonials duplicated on 4 pages; absent on 2	Add/vary testimonials
OP-006	MEDIUM	CONFIRMED	Homepage CTA strip omits 3 of 5 priority groups	Expand CTA strip
OP-007	MEDIUM	CONFIRMED	12A/80G H1 narrower than page scope	Update H1
OP-008	LOW	CONFIRMED	Misplaced GST return-filing sentence on Registration page	Correct or remove sentence
CONT-001	CRITICAL	CONFIRMED	Wrong firm name in Accounting FAQ	Correct firm name
CONT-002	CRITICAL	CONFIRMED	Stale AY2020-21 in ITR Mumbai FAQ	Professional review
CONT-003	CRITICAL	CONFIRMED	"Final Year 2021-22" table on LLP Annual Filing	Professional review
CONT-004	CRITICAL	CONFIRMED	Passed 2021-22 deadlines on 12A/80G page	Professional review
CONT-005	CRITICAL	CONFIRMED	Oct 2021 due dates, no disclaimer	Add historical notice
CONT-006	CRITICAL	CONFIRMED	Nov 2022 due dates, no disclaimer	Add historical notice

ID	Severity	Confidence	Issue	Recommended Action
CONT-007	CRITICAL	CONFIRMED	Waiver window closed March 2025, no notice	Add closed-window notice
CONT-008	HIGH	CONFIRMED	2021 GST Council meeting recap lacks framing	Add historical-record note
CONT-009	MEDIUM	CONFIRMED	June 2026 due-dates article still featured	Rotate featured post
CONT-010	HIGH	CONFIRMED	Tax-regime table has no FY/AY label	Add year label after verification
CONT-011	HIGH	LIKELY	Act-2025 section mappings unverified across 3 pages	Consolidated professional review
CONT-012	HIGH	CONFIRMED	5 pages' monetary figures lack date-stamp	Verify and date-stamp
CONT-013	MEDIUM	CONFIRMED	No named, checkable CA credential sitewide	Add named practitioner bio
CONT-014	CRITICAL	CONFIRMED	No Private Limited Company Registration page	Build dedicated page
CONT-015	HIGH	CONFIRMED	No LLP Registration (formation) page	Build dedicated page
CONT-016	HIGH	CONFIRMED	No Proprietorship Registration page	Build dedicated page
CONT-017	HIGH	CONFIRMED	Internal Audit is a one-row table mention only	Build dedicated section
CONT-018	HIGH	CONFIRMED	No company-side ROC/Annual Compliance page	Build pillar + subpages
CONT-019	HIGH	CONFIRMED	No Tax Consultancy page	Build dedicated page
CONT-020	MEDIUM	CONFIRMED	Partnership Registration lacks a service page	Build service page
CONT-021	MEDIUM	CONFIRMED	No GST Consultancy/Compliance page	Build consolidated page
CONT-022	MEDIUM	CONFIRMED	No Income Tax Compliance page	Build dedicated page
CONT-023	MEDIUM	POSSIBLE	Unverified third GST-related URL via anchor	Verify live status first

SECTION 11

Quick Wins — Manual Implementation

These are the genuinely low-effort, high-value items identified across both phases. Every step below is written for **the user** to perform — Claude does not implement any of these.

Quick Win 1 — Correct the wrong firm name on Accounting Services (CONT-001)

Why it matters: A live, Tier 1 commercial page tells a prospective client the wrong firm's name at the exact FAQ moment designed to build confidence before they enquire.

Where to implement: `/accounting-services/`, FAQ answer to "What are the Accounting services in Mumbai you provide?"

Step-by-step: (1) In WordPress Admin, open the Accounting Services page in Elementor. (2) Locate the FAQ widget/accordion for that question. (3) Replace "TAXZONA Consultancy" with "Shahnawaz and Associates" (or the firm's preferred exact name). (4) Read the rest of that FAQ answer and the page's other FAQs for any other un-customized third-party references. (5) Save and republish.

Validation: Re-fetch the live page and confirm the FAQ names the correct firm; search the rendered page for any remaining instance of "TAXZONA."

Quick Win 2 — Reconcile the Public Limited Company capital contradiction (OP-001)

Why it matters: The page states two different minimum paid-up capital figures in its own body copy — a material trust/decision-quality issue for figures a prospect would use to plan a real financial commitment.

Where to implement: `/public-limited-company/`, "Requirements" section and FAQ Q1.

Step-by-step: (1) Confirm the currently correct rule with a qualified CA/company-law professional. (2) In Elementor, edit both the "Requirements" section and the FAQ answer to state the same, verified figure (or explicitly frame one as historical if the rule changed at a known date). (3) Save and republish.

Validation: Re-fetch the live page and confirm both sections agree.

Quick Win 3 — Add historical/closed-window notices to 3 stale due-date articles (CONT-005/006/007)

Why it matters: These articles present long-expired or self-confirmed-closed deadlines with no disclaimer, on live, indexed pages.

Where to implement: `/gst-new-update-due-dates-for-october-2021/`, `/due-date-calendar-for-the-month-of-november-2022/`, `/waiver-of-late-fees-for-gst-annual-return/`.

Step-by-step: (1) Open each article in the WordPress editor. (2) Add a short, prominent notice block at the top (e.g., "This article describes [month/year] deadlines and is retained for historical reference" or, for the waiver article, "This waiver window closed 31 March 2025"). (3) Save and republish each.

Validation: Re-fetch each URL and confirm the notice is visible in the rendered content.

Quick Win 4 — Populate or remove the homepage's empty "TESTIMONIALS" section (OP-004)

Why it matters: The homepage is the site's highest-traffic entry point and primary trust surface; a labeled but empty proof section undercuts exactly the message it's meant to send.

Where to implement: Homepage , "TESTIMONIALS" H2 / "What People Are Saying About Us."

Step-by-step: (1) Open the live homepage in a standard browser and scroll to the testimonials section to confirm whether it's genuinely empty (this could not be confirmed via this session's tools). (2) If empty, open the homepage in Elementor, locate the Testimonials widget, and either link it to the same data source as the service-page testimonial widget or manually add 2–3 of the real testimonials already displayed elsewhere on the site.

Validation: Re-view the homepage and confirm testimonial content now displays.

Quick Win 5 — Fix the sitewide mixed http/https internal-link scheme (TECH-006)

Why it matters: Every `http://` internal link forces an unnecessary redirect hop and dilutes link equity slightly, at scale, across a sitewide, high-frequency link position (footer).

Where to implement: Footer menu/widget and Elementor templates sitewide.

Step-by-step: (1) Install/use a database-safe search-and-replace plugin (e.g., "Better Search Replace," which safely handles serialized Elementor JSON). (2) Run a search-and-replace of `http://cashahnawaz.com` → `https://cashahnawaz.com` across post/page content and Elementor template data. (3) Separately check Appearance → Menus for any manually-entered `http://` URLs.

Validation: Re-fetch the footer and main navigation and confirm all internal hrefs read `https://`.

Quick Win 6 — Update the 3 outdated footer links (TECH-002)

Where to implement: Site footer (Appearance → Menus, or the Elementor footer template).

Step-by-step: (1) Locate the three footer links pointing to `http://cashahnawaz.com/project-business/trademark-registration/`, `http://cashahnawaz.com/income-tax-return-filing-in-mumbai/`, and `http://cashahnawaz.com/online-tds-return-filing/`. (2) Update each href to its current correct URL (`https://cashahnawaz.com/trademark-registration/`, `https://cashahnawaz.com/income-tax-return-filing-in-mumbai/`, `https://cashahnawaz.com/tds-return-filing-services/`). (3) Separately confirm in WordPress Admin whether the old slugs still resolve to live content.

Validation: Re-fetch the footer and confirm updated hrefs; re-fetch the old URLs and confirm a clean redirect or 404.

Quick Win 7 — Exclude or noindex the 2 thin category archives (TECH-003)

Where to implement: Rank Math → Sitemap Settings / Titles & Meta → Taxonomies.

Step-by-step: (1) In Rank Math's Taxonomies settings, locate the `mca` and `donation` terms. (2) Toggle off sitemap inclusion, or set a noindex directive while keeping the archive reachable to visitors.

Validation: Re-fetch `category-sitemap.xml` and confirm the toggled term(s) no longer appear.

Quick Win 8 — Add dropdown-only lead categories ahead of new pages

Why it matters: Adding "Private Limited Company Registration" and "Proprietorship Registration" as enquiry-dropdown options — even before their landing pages exist — starts capturing trackable lead demand immediately, at near-zero cost.

Where to implement: The enquiry form's "Select Service" dropdown (coordinate with whichever plugin renders it — see Section 6's form-plugin ambiguity note).

Step-by-step: (1) Identify the form-builder plugin actually controlling the live dropdown (verify via WordPress Admin, since this remains ambiguous per this audit's tools). (2) Add "Private Limited Company Registration" and "Proprietorship Registration" as new dropdown options, matching the existing option format. (3) Save.

Validation: Re-fetch the live form and confirm the new options appear in the dropdown.

SECTION 12

Manual Implementation Roadmap

Every item below is performed manually by the user. Expected Benefit is stated as High/Medium/Low only — this report makes no ranking or traffic guarantee.

PHASE 1 — Immediate Priority

Action	Priority	Expected Benefit	Manual Implementation Area
Fix wrong firm name (CONT-001)	CRITICAL	High	WordPress/Elementor FAQ edit
Route ITR Mumbai, LLP Annual Filing, 12A/80G stale content to professional review (CONT-002/003/004)	CRITICAL	High	Professional review + WordPress/Elementor content edit
Add historical/closed-window notices to 3 stale articles (CONT-005/006/007)	CRITICAL	Medium	WordPress editor
Reconcile Public Ltd Co capital contradiction (OP-001)	HIGH	High	Professional review + Elementor edit
Begin Private Limited Company Registration content brief (CONT-014)	CRITICAL	High	Content commissioning (longest lead time in this tier)

PHASE 2 — High Value Improvements

Action	Priority	Expected Benefit	Manual Implementation Area
Verify/relabel possible LLP nav-link mislabel (OP-002)	HIGH	Medium	WordPress Admin → Menus
Confirm and populate homepage testimonials (OP-004)	HIGH	Medium	Browser check + Elementor edit
Consolidated professional review of Act-2025 section mappings across 3 pages (CONT-011)	HIGH	Medium	Professional review
Date-stamp monetary figures on 5 Tier 1 pages (CONT-012)	HIGH	Medium	Professional review + content edit
Build LLP Registration, Proprietorship Registration, Tax Consultancy pages (CONT-015/016/019)	HIGH	High	Content commissioning + WordPress/Elementor build
Build company-side ROC/Annual Compliance pillar + subpages (CONT-018)	HIGH	High	Content commissioning + WordPress/Elementor build
Expand Internal Audit into a dedicated section (CONT-017)	HIGH	Medium	Content commissioning + Elementor edit
Add historical-record framing / FY label (CONT-008/010)	HIGH	Low	WordPress editor

PHASE 3 — Content & Service Expansion

Action	Priority	Expected Benefit	Manual Implementation Area
Standardize pricing-disclosure policy across Tier 1 (OP-003)	MEDIUM	Medium	Business decision + content edit
Vary/add testimonials sitewide (OP-005)	MEDIUM	Medium	Client outreach + Elementor edit
Expand homepage CTA strip to all 5 priority groups (OP-006)	MEDIUM	Medium	Elementor edit
Widen 12A/80G H1 to full scope (OP-007)	MEDIUM	Low	Elementor edit
Add named practitioner bio and ICAI credential (CONT-013)	MEDIUM	Medium	Content + About Us page edit

Action	Priority	Expected Benefit	Manual Implementation Area
Build Partnership Registration, GST Consultancy/Compliance, Income Tax Compliance pages (CONT-020/021/022)	MEDIUM	Medium	Content commissioning + WordPress/Elementor build
Verify CONT-023's unverified URL and correct anchor if needed	MEDIUM	Low	Browser check + content edit
Resolve TECH-001 slug collision and TECH-002 footer links	MEDIUM	Low	WordPress Admin + footer edit

PHASE 4 — Further SEO Development

Action	Priority	Expected Benefit	Manual Implementation Area
Fix TECH-005/006/007, WP-001, OP-008 (LOW items)	LOW	Low	Various — opportunistic during other edits
Commission Internal Linking Audit	—	Medium	Future audit phase
Commission Schema Audit (once raw-HTML access resolves JSON-LD visibility)	—	Medium	Future audit phase
Commission Performance / Core Web Vitals testing	—	Medium	Future audit phase
Commission Local SEO Audit (NAP consistency, map embed, WhatsApp)	—	Medium	Future audit phase
Commission Competitor Analysis	—	Medium	Future audit phase
Establish GSC/GA4/GTM connectivity for future analysis	—	High (unlocks data-driven prioritization)	Analytics/tooling setup

SECTION 13

30/60/90 Day Roadmap

First 30 Days

- Fix CONT-001 (wrong firm name) — same day, single-sentence edit.
- Route CONT-002, CONT-003, CONT-004 (Tier 1 stale content) to a qualified CA/tax professional as one batch review.
- Add historical/closed-window notices to CONT-005, CONT-006, CONT-007 — mechanical, no professional review needed for the notice text itself.
- Fix OP-001 (Public Ltd Co contradiction) after professional verification.
- Confirm and address OP-004 (homepage testimonials).
- Complete Quick Wins 5–7 (http/https cleanup, footer link update, thin-archive sitemap toggle — TECH-002/003/006).
- Confirm the TECH-001 slug collision in WordPress Admin.
- Begin the Private Limited Company Registration content brief (CONT-014) — longest lead-time item, start now so it lands in the 31–60 day window.
- Add "Private Limited Company Registration" and "Proprietorship Registration" as enquiry-dropdown options (Quick Win 8).

Days 31–60

- Complete the consolidated professional review of CONT-011 (Act-2025 section mappings) and CONT-012 (date-stamping monetary figures).
- Resolve OP-002 (nav-link verification) via WordPress Admin.
- Build out CONT-017 (Internal Audit section expansion) — fastest of the coverage-gap items since it extends an existing page.
- Begin content production for CONT-015 (LLP Registration), CONT-016 (Proprietorship Registration), CONT-019 (Tax Consultancy), and CONT-018 (company-side Annual Compliance pillar + subpages) as one coordinated content batch alongside CONT-014.
- Standardize pricing disclosure (OP-003) and expand the homepage CTA strip (OP-006).
- Add named practitioner credential to About Us and Audit Services (CONT-013).
- Verify CONT-023's unverified URL.
- **Begin the Internal Linking Audit** (next phase — see Section 15) to formalize the many specific cross-link gaps already surfaced in this report (Section 8 ↔ 12A/80G reciprocity, Accounting ↔ Audit distinction links, TDS chart ↔ TDS service page).

Days 61–90

- Publish the new Registration & Compliance pages built in Days 31–60; cross-link them bidirectionally with existing pages per each finding's guidance.
- Build out lower-priority coverage gaps: CONT-020 (Partnership Registration), CONT-021 (GST Consultancy & Compliance), CONT-022 (Income Tax Compliance).
- Add/vary testimonials sitewide (OP-005) and finalize any remaining LOW-severity items (TECH-005/006/007, WP-001, OP-008).
- **Schema Audit** — *scheduled, dependent on resolving the JSON-LD visibility gap with raw-HTML or browser access; not yet performed.*

- **Local SEO Audit** — *scheduled; will address the NAP address-format inconsistency noted on the 12A/80G page and the confirmed-absent WhatsApp entry point.*
- **Competitor Analysis** — *scheduled; not yet performed.*
- **Performance / Core Web Vitals testing** — *scheduled once a Lighthouse/PageSpeed-capable tool is available; not yet performed.*

All items marked *scheduled* above are explicitly future-audit-dependent — they are not confirmed fixes ready today, and no result from them is presented in this report.

SECTION 14

Data Limitations

The following are `DATA NOT AVAILABLE` across every phase of this audit to date:

- Google Search Console (Coverage, Sitemaps, URL Inspection, Core Web Vitals report)
- Google Analytics 4
- Google Tag Manager (container `GTM-N2LHGRCX` per CLAUDE.md could neither be confirmed nor denied on the live site)
- Core Web Vitals / Lighthouse / PageSpeed Insights
- Raw HTTP response headers (status codes, `X-Robots-Tag`, `Cache-Control`, `Location` /redirect targets)
- Browser automation or rendered screenshots (no visual, above-the-fold, or sticky-CTA claim can be made anywhere in this report)
- WordPress Admin access (no plugin list, theme confirmation, or settings screen was verified directly)
- Hosting access (PHP version, server configuration, `.htaccess`)
- Meta robots tag content — `NOT VISIBLE` on effectively every fetch this session (tool limitation, not confirmed absence)
- Canonical tag targets — `NOT VISIBLE` sitewide (tool limitation)
- JSON-LD / structured data presence — `NOT VISIBLE` sitewide despite Rank Math being confirmed active (tool limitation)
- JS-rendered / client-side-injected content
- Keyword search volume, ranking position, organic traffic, conversion rate, and backlink data — none of this exists anywhere in this project and none is claimed anywhere in this report

DATA NOT AVAILABLE does not mean the website has a problem. It means the issue could not be verified within the available audit environment.

SECTION 15

Next Audit Phases

The following remain outside the scope of this interim report:

- **Internal Linking Audit** — NOT YET INCLUDED IN THIS INTERIM REPORT.
- **Schema Audit** — NOT YET INCLUDED IN THIS INTERIM REPORT.
- **Performance Audit** — NOT YET INCLUDED IN THIS INTERIM REPORT.
- **Competitor Analysis** — NOT YET INCLUDED IN THIS INTERIM REPORT.
- **Local SEO Analysis** — NOT YET INCLUDED IN THIS INTERIM REPORT.
- **Conversion and Lead Generation (CRO) Audit** — NOT YET INCLUDED IN THIS INTERIM REPORT (only content-alignment was checked in Phase 1B; design/UX-level CRO was explicitly out of scope).
- **GSC Analysis** — NOT YET INCLUDED IN THIS INTERIM REPORT.
- **GA4 Analysis** — NOT YET INCLUDED IN THIS INTERIM REPORT.
- **GTM and Conversion Tracking Audit** — NOT YET INCLUDED IN THIS INTERIM REPORT.

SECTION 16

Final Conclusion

Cashahnawaz.com stands on a genuinely clean technical and WordPress foundation. Phase 1A found zero CRITICAL and zero HIGH severity issues across crawlability, indexation, sitemap structure, and plugin/theme configuration — Rank Math is confirmed as the sole active SEO plugin, the sitemap is well-formed and correctly segmented, and `robots.txt` blocks nothing it shouldn't. This is not a site fighting a structural technical deficit.

The real, addressable priorities uncovered by this audit sit in **content accuracy and service coverage**, both of which Phase 1B examined in depth. Fifteen items across the site need a qualified professional's eyes on dates, deadlines, and figures — several of them one-sentence or one-paragraph fixes once verified. One live FAQ names the wrong firm. One page contradicts itself on a concrete number. And a dozen of the firm's named priority services — most consequentially Private Limited Company Registration, the entity type most Indian small businesses actually choose — have no dedicated page to meet a searcher looking for exactly that service, even while enquiry-form dropdown data confirms the firm already handles several of these engagements without any organic entry point to capture them.

None of this reflects a site in crisis. It reflects a well-built, content-rich CA firm website where a handful of pages have drifted out of date and a handful of common services were never given their own landing page — both are ordinary, fixable content-maintenance gaps, not structural failures. The strongest pages on the site (GST Registration, NRI Taxation, Section 8/12A-80G) demonstrate the firm already knows how to build genuinely deep, well-organized service content; the work ahead is applying that same standard consistently and keeping it current.

Completing the remaining audit phases — Internal Linking, Schema, Performance, Competitor, Local SEO, CRO, and the GSC/GA4/GTM analyses once connectivity is established — will sharpen prioritization further, particularly by replacing this report's inspection-based `LIKELY USER SEARCH INTENT` judgments with actual query-level demand data. Until then, the recommendation is straightforward: implement the findings in this report manually, in the priority order given, verify every regulated figure with a qualified professional before publishing it, and use each finding's Validation step to confirm the change actually took effect on the live site before considering it closed.
